COVID-19

INFORMATION

Is our local hospital, Adirondack Health, testing for COVID-19?

COVID-19 testing at Adirondack Health is restricted to inpatients at Adirondack Medical Center.

Anyone who suspects they have contracted COVID-19 should contact the health system's dedicated COVID-19 screening and triage clinic at 518-897-2462. Flu-like symptoms should be managed at home by resting, drinking water and self-isolating. Anyone experiencing shortness of breath or other difficulty breathing should go to the nearest emergency department, but also understand that doing so will only result in a COVID-19 test if their assessment leads to hospital admission.

Adirondack Health still has the supplies necessary to conduct COVID-19 tests but enacted the testing policy change in view of the national testing supply shortage and uncertainty surrounding delivery dates for back-ordered supplies.
